

At **Academy Eye Associates**, we strive to provide our patients with the best possible standard of care. Because of this, Dr. Canterbury believes the **optomap®** Retinal Exam is an essential part of your comprehensive eye exam and recommends it for all her patients.

- **NO DILATION IS NEEDED** with this easy, non-invasive photo!
- **optomap®** technology provides a 200° angle image (vs. a standard 45° retinal camera).
- Enables Dr. Canterbury to more easily identify retinal problems such as: macular degeneration, glaucoma, detachments, diabetic changes, melanoma, & hypertensive changes.
- Year-to-year retinal comparisons can be made with these photos in your medical file.

Unless you have a medical finding, there is a **\$39.00 co-pay** because this retinal photo is usually a non-covered service.

Any questions you have about the **optomap®** Retinal Exam can be directed to Dr. Canterbury when she reviews the images with you during your exam.
